

Sebastian Östlund

CTO | Senior Software Engineer | KTH

Master of Science in Computer Science from KTH Royal Institute of Technology with more than 12 years of experience in software development, system architecture, technical leadership, VR/MR, real-time graphics, backend development, and AI/ML. Most recently served as Chief Technology Officer (CTO), with overall responsibility for technology strategy, product development, system architecture, and leading development teams.

Work Experience

CTO & Senior Developer Imitera AB

Training and Product Visualization

Stockholm, Sweden

2020 - 2026

- As CTO, led product vision, architecture, and technical strategy for a Unity based VR/MR platform alongside hands-on core development.
- Developed immersive B2B 3D solutions for product visualization, sales enablement, and technical training across aerospace, manufacturing, and transportation sectors.
- Built desktop and VR training simulators, including aircraft marshalling and emergency response scenarios for Sundsvall-Timrå Airport.
- Engineered modular systems and reusable frameworks to reduce development time, optimizing real-time rendering for VR and mobile platforms.
- Managed Agile workflows and the complete software lifecycle, translating client needs into technical solutions and supporting sales through proof-of-concepts.
- Mentored engineering teams and drove technical recruitment, establishing coding standards to ensure scalable architecture and long-term product sustainability.

Senior Developer Brighter AB

Research and Development

Stockholm, Sweden

2015 - 2018

- Led development of Unity-based AR and MR applications for iOS and Android, driving system design, 3D graphics, and mobile performance optimization.
- Built the Actiste MR application, creating an interactive 3D product demonstration to visualize and educate users on the Actiste diabetes device.
- Developed an interactive mobile AR experience based on astronaut Christer Fuglesang's children's book, Rymdresan, bringing its content to life with 3D animations.
- Headed development for a VR entertainment platform featuring interactive adventure games inspired by tabletop RPGs like Dungeons & Dragons.
- Provided technical consulting for jDome BikeAround, driving ongoing maintenance, feature expansion, and continuous platform upgrades.

Software Engineer Division By Zero

Healthcare company

Stockholm, Sweden

2014 - 2015

- Served as lead architect and sole developer for jDome BikeAround and WalkAround, building the entire software platform from concept to launch using C++ and OpenGL.
- Integrated Google Street View data to implement real-time rendering and navigation, creating interactive virtual environments focused on rehabilitation, physical activity, and cognitive stimulation.
- Developed custom hardware integrations and UI/UX systems, successfully connecting bikes, sensors, and controllers to the main software platform.
- Managed the complete software lifecycle independently, handling requirements analysis, system design, performance optimization, testing, and deployment.

SKILLS

Optimization

Immersive Technology

Data Visualization

Agile Leadership

Ray Tracing

System Architecture Design

Project Management

TECHNICAL

Languages & Paradigms

C, C++, C#, Java, Python, TypeScript, PHP, SQL, HTML, CSS, Assembly, OOP, .NET, Mathematica

Game Development

Unity, MR, VR, Cinema 4D, GPGPU, Shaders, Particle Systems

Tools & Project Management

Git, Agile, Scrum

EDUCATION

Master in Computer Science KTH Royal Institute of Technology

Stockholm, Sweden

2009 - 2014

- Program focused on advanced algorithms, software architecture, establishing a robust foundation in scalable system design.
- Specialized in computer architecture and optimization, and high-performance visualization systems.
- Applied software engineering best practices, utilizing UML modeling, structured architectural planning, and systematic design methodologies to map out and execute complex software projects.
